

Advanced Lens Adjustment Module (LAM)

Universal setup tool for any Vantage[®] camera

Benefits of the Advanced Lens Adjustment Module (LAM)

35% smaller and 10% lighter than the original LAM

Compatible with all legacy and new video detection cameras produced by Iteris

Its simple-to-use interface improves productivity

Ruggedized for harsh field environments

The Advanced LAM is an updated camera lens adjustment tool used to adjust Iteris' video detection camera's field-of-view and focus. The electronic components are enclosed in a hardened case for ease of handling and provide greater protection to the LCD monitor.

The Advanced LAM is compatible with all legacy and new video detection cameras produced by Iteris that utilize Edge processors. Its form factor and ergonomics are well suited for day-to-day handling by field technicians and can withstand the rigors of extreme temperature and weather conditions.

This all-in-one lens adjustment module is an invaluable tool for all field technicians that install, service, and maintain Iteris video detection systems.

Advanced Lens Adjustment Module (LAM)

Universal setup tool for any Vantage® camera
