Yuttraffic Blade

Edge Capable Advanced Traffic Controller

New Design

Next Generation Traffic Control

Yuttraffic Blade is a next generation traffic controller with advanced edge/IoT capabilities. It is designed to receive sensor data from various sources such as cameras, radar sensors, and in-ground loop detectors for real-time intersection control.

The Yuttraffic Blade serves as an edge processing platform able to store and analyze large data sets directly on the device and utilize AI-based algorithms to improve traffic control.

Yuttraffic Blade supports all common cabinet types and can be configured individually according to the specific customer requirements in terms of interfaces and capabilities.

High Level of Security

The Yuttraffic Blade has been designed with IT Security in mind from day one, and responds to growing needs around critical infrastructure and Zero Trust environments. The Yuttraffic Blade supports a wide range of security features to implement state-

of-the-art level of protection and can be configured to utilize the security capabilities that your agency currently has, as well as capabilities for future requirements. Account management functionality provides single user role-based sign-in, allowing for complete change traceability from operational and cybersecurity areas.

Ease of Use and Predictive Maintenance

This advanced edge device provides a modern user experience with a full color touch screen, web user interface, and optimized workflows. The Yuttraffic Blade can be upgraded remotely, saving agencies time and money, and provides detailed device health data for diagnostics and maintenance. With the ability to deploy additional features overtime, you are future-proofing your traffic platform for today and tomorrow's needs.

The redundant hot-swappable power supply means zero downtime to replace a failed unit. The Yuttraffic Blade has been designed and tested for high MTBF in harsh environmental conditions, from the system architecture to the component selection, making it extremely durable and reliable.

Yuttraffic Blade Controller Series Features

Key Features

- Experience versatility with a Slim 2U enclosure for both rack and shelf mount versions.
- Enhanced UX and optimized workflows for ease of use
- Powerful Quad-Core ARM Co-Processor to compliment PowerPC Engine Board.
- Enhanced communication options including 4-port managed switch, Wi-Fi Access Point, LTE/5G modem, and Power-over Ethernet.
- Direct GNSS connection
- Easily configure, diagnose and remotely update with the browser-based user interface.
- Ready for 48 VDC cabinets
- High security level with authentication and security updates, secure boot, firewall and VPN support.
- Supports all ATC and NEMA standards
- 7-inch full color touch display for superior user experience.

Technical Details

- Configurations for NEMA TS1/TS2, ATC and 33X cabinets
- Engine board with Linux 4.4 with Super Long-term support for running SEPAC
- Compatible with NEMA, ATC 5201 v06, NTCIP 1202 and NTCIP 1211 standards
- Wi-Fi / Bluetooth hotspot for smart devices and travel time applications
- GNSS with 2.0 m CEP position accuracy and WAAS corrections support (GPS, Galileo, GLONASS, Beidou)
- 4 x Ethernet with 4 port Ethernet switch
- Browser-based WebGUI for remote diagnosis and configuration

- Optional built in PoE injector

Security

- Compliant with CTIA Cybersecurity Certification
- Integrated Advanced Security, Safety and Reliability

CPU / Memory

- Quad core CPU at 1.6 GHz for edge computing
- 4GB DDR RAM
- 32GB Flash

Interfaces

- NEMA TS1 A, B, C, D connectors
- NEMA TS2 Port 1 connector
- 4× 10×100/1000BASE-T Ethernet ports
- Optional 1 × 802.11 b/g/n Wi-Fi & Bluetooth 5.0 BR/EDR/BLE
- Optional legacy GPS, RS-232, FSK
- Optional 4-port managed 10/100 1000BASE-T switch
- 1 x internal mPCIe slot for future extension

Mechanics

- Dimensions: 3.5" H x 17.3" W x 11.5" D
- Weight: 15 lbs.

Environmental

- Operating Temperature: -34 to +74°C

Power

- Input: 110/220 VAC
- Power consumption: 45 W
- Optional advanced feature: redundant power supply

Let's shape the future of mobility together!

Yunex, LLC

us.yunextraffic.com

Yunex Traffic is a global leader in the field of intelligent traffic systems, offering the widest end-to-end portfolio of solutions for adaptive traffic control and management, highway and tunnel automation, as well as smart solutions for V2X and road user charging tolling. Yunex Traffic has 3100 employees from 58 nations and is active in over 40 countries worldwide. Its intelligent mobility solutions are currently being used in major cities across the world, including Dubai, London, Berlin, Bogota, and Miami. Yunex Traffic has successfully concentrated its efforts on mastering technologies in the three segments of hardware, software, and service, and is subsequently the only supplier who is capable of meeting all major regional standards in Europe, UK, Asia and America. Further information is available at us.yunextraffic.com.
